

REMOTE MONITORING SYSTEM

• Four-Faith Fault Location System

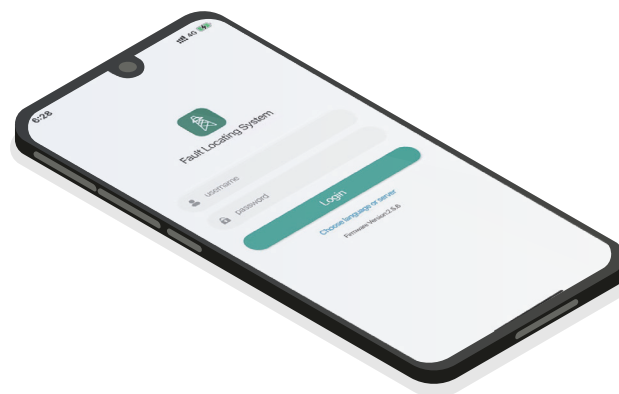

System Features

• FIOS APP

- Support customer's custom design
- Maintenance and backup of data
- Simple operation interface
- Suitable for small scale applications

ACCESSORIES

• For Overhead Line Fault Circuit Indicators

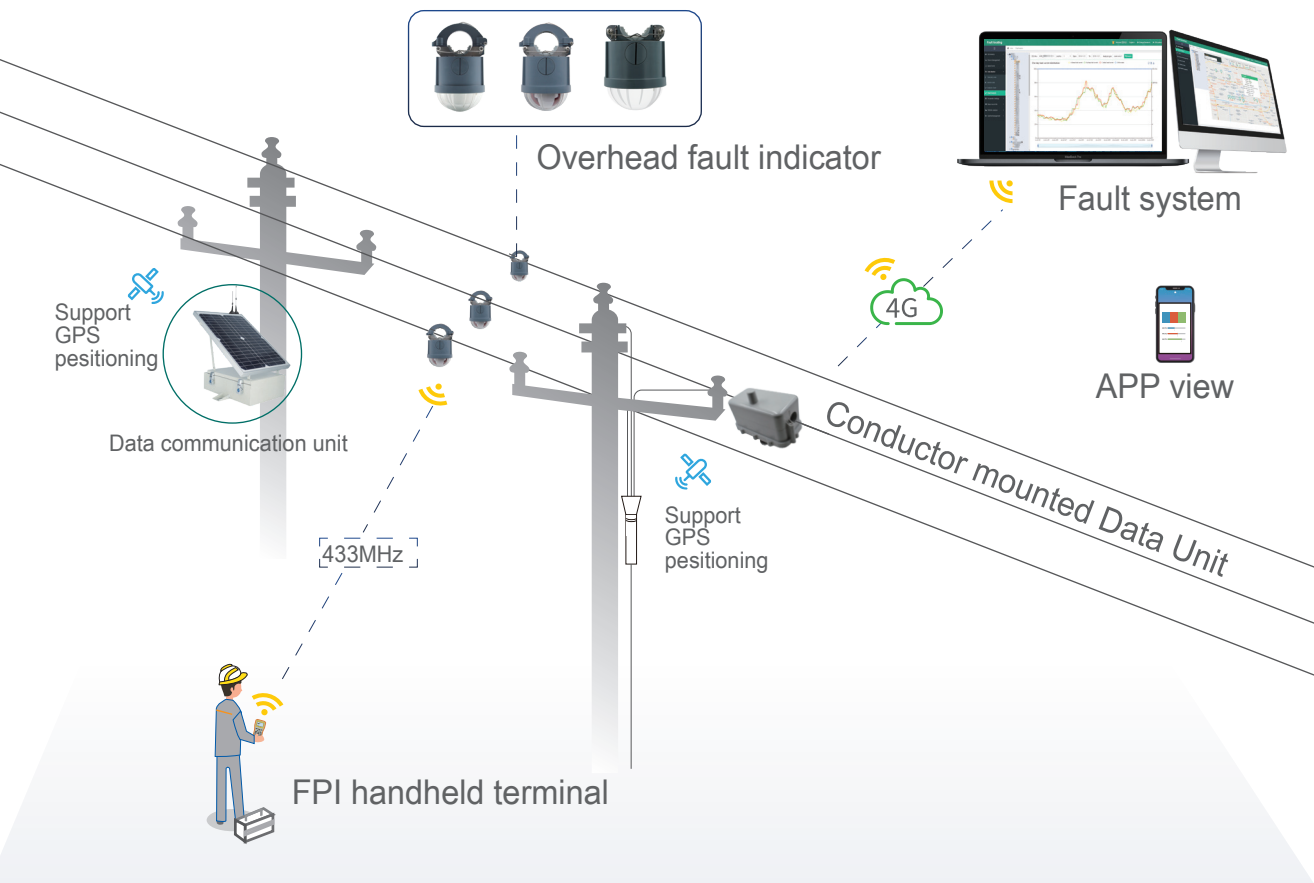

Hot Stick Tool
Hot stick tool is an installation and disassembly tool for Four-Faith Fault Indicator (FCI) JYZ-FF/HW family series.

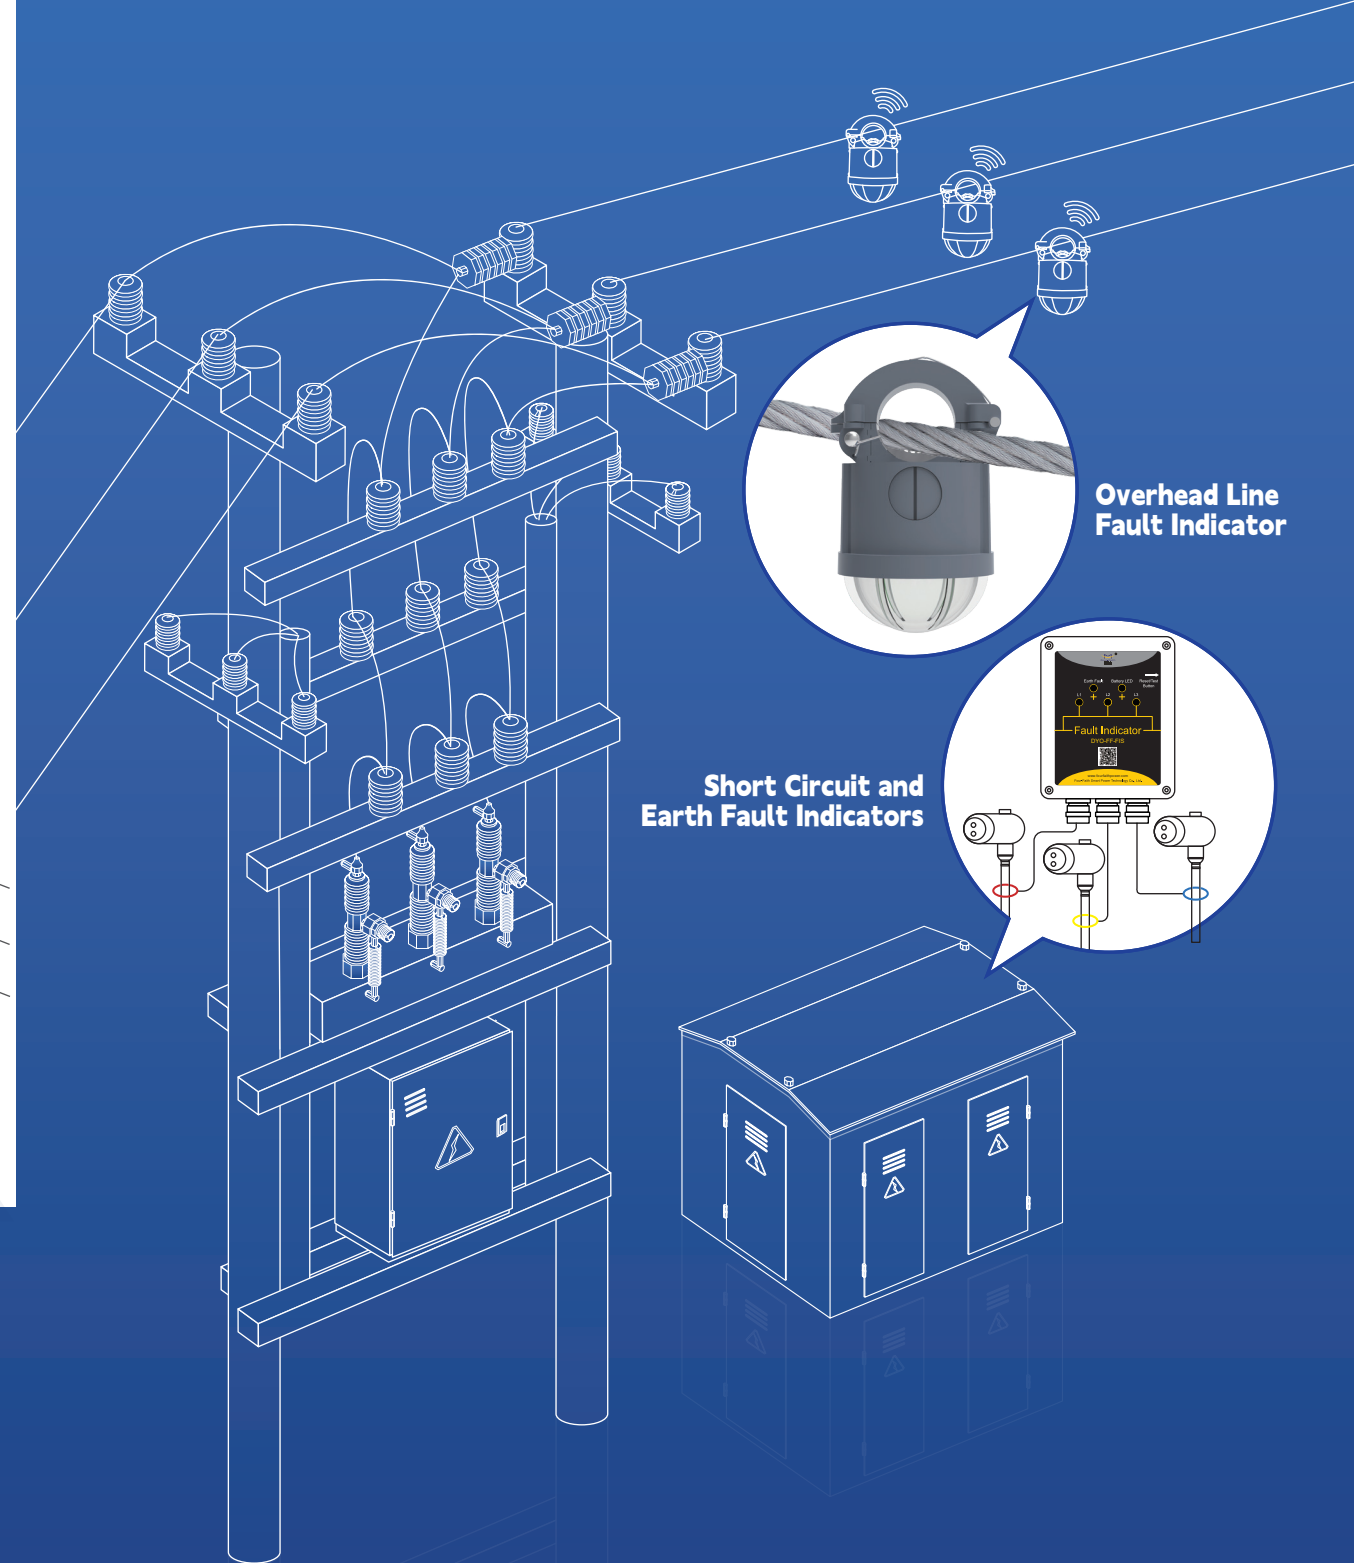

Hand-held Tool FPI-Hand
FPI-Handheld is portable operating equipment which is for remote management of the front-end products.

Usb Transmitter
USB transmitter for JYZ-FF/HW family series FCI Commissioning.

FOUR-FAITH FAULT CIRCUIT INDICATORS

Global Power Distribution Automation Provider
Four-Faith Smart Power Technology Co.,Ltd.

+86 17750019379 business@four-faith.com www.fourfaithpower.com

• LED Fault Indicator (JYZ-HW)

Main Function:

- Replaceable lithium cells
- 3 colors LEDs indication

Product Features:

- Event based data reports
- Time-Stamped Alarms
- With load adaptive function

• Flag Fault Indicator (JYZ-FF)

Main Function:

- Mechanical flag and LED indicator
- Low battery warning

Product Features:

- Online monitoring of network status
- Remote configuration, remote management
- Dual mode reset

• Local Fault Indicator (JJZ-HW)

Main Function:

- Short circuit and earth fault detection
- Bright LED local indication

Product Features:

- Trip Current DIP Setting
- Configurable reset time
- Economical and maintenance-free

• Pole Mounted Control Unit (JYZ-FF-HD)

Main Function:

- Main and backup power Supply
- Modular design

Product Features:

- Support GPS positioning (Optional)
- Rich interfaces (RS232&Ethernet)
- Multi-protocol optional IEC101/IEC104//DNP3.0

• Conductor Mounted Control Unit (JYL-FF-HX)

Main Function:

- Harvest energy online
- Conductor mounted

Product Features:

- Conductor mounted, maintenance-free
- IP67 protection
- Self-diagnosis and self-recovery function

• Underground Fault Indicator (DYO-FF-FI)

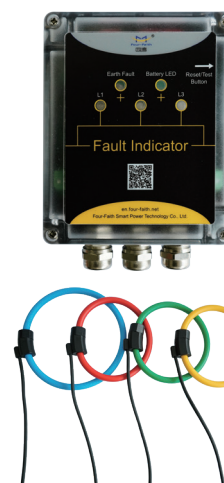

Main Function:

- Short-circuit and earth fault detection
- LED fault indication

Product Features:

- Various I/O interfaces
- Multiple reset methods
- DIP local configuration

• Underground Fault Indicator (DYO-FF-FIS)

Main Function:

- Short-circuit and earth fault detection
- LED fault indication

Product Features:

- Support remote solutions
- Plug-in current sensor
- Superior precision design
